

# Nexus Global Dynamic Port A USD

FACTSHEET - January 2025

## Strategy Objective

The Nexus Global Dynamic Portfolio is an actively managed, globally diversified, equity portfolio. The manager has the mandate to seek value globally and is not constrained by a benchmark.

## Investment Process

The Nexus Global Dynamic Portfolio is an actively managed, globally diversified, equity portfolio. The manager has the mandate to seek value globally and is not constrained by benchmarks. Stock selection is driven by a firm understanding of an individual company's underlying business fundamentals and how they relate to an ever-changing world. It is important to consider the interplay of monetary and fiscal policies around the world and how significant changes in these policies may affect equity markets. High conviction ideas are generated by a combination of internal and external research and quantitative and technical analysis. Owning equities and investing in the stock market allows an investor to participate in the future growth of the world. A diversified and liquid portfolio of equities will benefit in an ever-changing and growing world economy, where innovation and technological advances continue to drive new investment opportunities. One of our objectives is to identify future trends and themes using our internal analytical capability and to find ways to allow the Dynamic Portfolio to participate.

## Market Commentary

Enthusiasm over Donald Trump's US Presidential Election victory, coupled with optimism for the continuation of strong US economic growth carried into January. The month proved a fruitful one for most major equity markets. Fixed income markets also stabilised in the latter half of the month as the fears about fiscal deficits and inflation abated.

Towards the end of the month, two developments took centre stage and are poised to influence the market for some time. The first was the emergence of the Chinese AI app DeepSeek, whose creators claimed to have spent a fraction of what Open AI spends on creating and training a large language AI model, and they did it without access to Nvidia's latest and greatest GPUs. This revelation challenges the AI investment theme and questions the wisdom of the huge capital spending by the mega cap tech names in the US. The market response was sharp and quick - Nvidia fell by 17% on the day the news broke, resulting in the largest daily loss (\$589 bn) for a single stock in history.

The second major development was the inauguration of Donald Trump for a second term as US President and his immediate plans to place tariffs on the exports of China, Canada, and Mexico.

Many of our investment themes came to life this month. European defence stocks did very well with returns ranging from 7 to 15% on average in January. Energy and mining names also posted high single digit gains on the month. Despite the challenge that the advent of DeepSeek poses to US tech, our technology exposure fared well with Meta up over 16% on the month for example.
